EXAMEN KEUZEDEEL

BASIS PROGRAMMEREN VAN GAMES

K0788

BIJLAGE 1 VOOR DE KANDIDAAT

GAME DESIGN DOCUMENT

Dit examen is ontwikkeld door Bob van den Berge, coach bij de Bit Academy, en Joey Schmitz, docent Software Development bij ROC van Flevoland. Onze dank gaat uit naar Lincy Ellermeijer, game developer en docent Game Development bij de HvA, voor haar hulp bij het ontwikkelen van het theoretische deel van de lesstof.

Project Concept

1 Player Control

You control a *futuristic spaceship* in this *third-person 3D game* game

where *WASD keyboard input* makes the player *move left, right, up and down inside the tunnel*

2 Basic Gameplay

During the game, *asteroids and cyan energy orbs appear* appear from *area(s) of the screen*

and the goal of the game is to *survive as long as possible, dodge asteroids and collect energy*

3 Sound & Effects

There will be sound effects *Metallic crash sound when the spaceship hits an asteroid, a bright electronic chime when collecting blue energy orbs, and continuous futuristic background music.* and particle effects *Bright cyan sparkles when collecting energy orbs, impact sparks when colliding with asteroids, and a glowing spaceship engine trail.*

[*optional*] There will also be *Cyan and purple neon tunnel lighting, Bloom glow effects, and a purple space nebula background for a futuristic atmosphere.*

4 Gameplay Mechanics

As the game progresses, *asteroids spawn more often* making it *the game becomes harder*

[*optional*] There will also be *3 collected orbs refill one life if a life has been lost*

5
User Interface

The | will | whenever

score/lives/timer | *increase/decrease* | *on asteroid damage / with survival*

At the start of the game, the title | and the game will end when

NEON DRIFT | will appear | *all 3 lives are lost*

6
Other Features

Three selectable ships (Viper, Phantom, Blaze). Best survival time is saved locally. Required additions before final hand-in: victory condition, sound/effects, and school branding.

Project Timeline

Milestone	Description	Due
#1	*-Unity project, spaceship movement and camera*	*10/14*
#2	*-Asteroid spawning, collision and three lives*	*10/17*
#3	*- Energy orbs, life recharge, defeat and restart*	*10/20*
#4	*- Main menu, three ships, survival timer, high score*	*10/25*
#5	*- Neon polish, required audio/win features, tests and GitHub*	*10/30*
Backlog	*- Optional: more ship designs; shields; online scores. These are outside the required minimum.*
